

## 5 ELEMENTS VOLCANIC DRY POWDER CAT SHAMPOO

---

Morocco Method 5 Elements Volcanic Dry Powder Cat Shampoo combines clays, minerals and botanicals from around the world to gently absorb excess oils and toxins, giving coat a natural glow without dusty residue. Its unique formulation dynamically assists in repelling fleas and ticks while reversing chemical damage caused by synthetic pet shampoos.

Its main ingredient, bentonite clay, is a naturally forming volcanic powder that draws out impurities from the roots and follicles while also protecting the skin's natural oils. Amla fruit powder, soothing oat and rosemary deliver essential vitamins and anti-oxidants to seal in moisture, reduce inflammation of the skin and leave fur soft and manageable.

Dog and horse friendly.

### How to Use

Sprinkle powder into palm and gently massage into coat. Work from head to tail, avoiding eyes, mouth and nose of pet. If necessary, remove excess powder using brush or comb. Best used as a coat freshener between wet bathing. *If sensitivities occur consult your veterinarian.*

### Other Uses

- Acts as natural sun protectant.
- Natural catnip helps reduce stress and aid in relaxation during grooming.
- Use in the show ring to increase volume, fullness and shine of coat or tail.
- Add water and apply as a poultice to horse legs to reduce inflammation after hard workouts. Not for overnight use or for use with wraps, rinse to remove from legs.
